Cumulative Keyword Index for 1970–73

The index covers articles, bibliographies, book reviews, research reports, "Ideas for Discussion," "Discussion and Criticism," and "Urgent Anthropology" published in 1970 and thereafter. (A cumulative index for 1960–69 appears in CA 10:569–608.) It has two parts. The alphabetical part lists keywords, authors, and commentators (the latter distinguished by asterisks) with the year of publication and the opening page number of the article to which each refers. The chronological part gives the main contents of the volume in order of appearance and lists the keywords (other than those taken from the title) and commentators for each. Keywords are selected by the authors or by the editorial staff from the text of the article and the comments (see CA 7:362–33 for discussion of keyword indexing in general). Users of the index may first locate keywords of interest in the alphabetical list and then find further information in the chronological list before going to the journal issue itself.
